CENTRAL HOSPITAL

An Interesting Report by Dr. Drewry, Superintendent.

INSANITY ON INCREASE

Rapid Growth of Diseases Among the Negroes that Were Almost Unknown Among Them in the Ante-Bellum Days.

(Special to The Times-Dispatch.) PETERSBURG, VA., Oct. 17,-Dr. W. F. Drewry, superintendent of the Cenfor the fiscal year ending September 30th, The year has been one of more than ordinary interest, and has much to mark it as an extraordinary one. The business and financial affairs were never in a bet-At Druggists, 25 cents, or malled.

Streets, New York. other year with \$6,623.23 to its credit. The cost per capita for the year was \$95.58. There have been a good many improvements at the hospital during the time, more extensive, perhaps, than any previous year. A steel tank, with capaprevious year. A steel tank, with capa-city of 60,000 gallons, was constructed; new pump house built of granite, cement and brick; hundred horse-power english installed, with two compound pumps; in-ternal telephone system, store-house, drains, and many other improvements. The farm and garden give employment to many inmates, while scores of others field work in the shous. find work in the shops.

INSANITY INCREASE.

Probably one of the most interesting parts of the report is the reference to the increase of insanity among the negroes and its causes. "From the bost available information." he says, "insanity and tuberculosis, as well was almost unknown among the ante-bellum negroes. In 1860, only twenty-five insane negroes were in the Virginia State Hospital. In 1870 there were 123. To-day there are 1.074. In 1860 there was one unsane negro to 7.000 of the population; 1870, 1 to 3.000; 1880, 1 to 1.000; in 1890, 1 to 550; 1900, 1 to 645. From 1880 to 1890 the negro population increased one per 1 to \$50; 1909, 1 to 645. From 1890 to 1890 the negro population increased one percent, while insanity in that race increased 110 per cent. From 1890 to 1900, the population increased 3.9 per cent. While insanity increased 5.9 per cent. The following is the ratio of the white insane: 1889, 1 to 830 of the population; 1900, 1 to 530. From 1880 to 1900, there was 15 per cent. increase in insanity among whites; 50 per cent. increase of number in hospitals.

RACE DEGENERATION.

"The increase of insanity among the negroes, in my opinion," he continues, "is in a great measure a result as well as an indication of progressive race deas an indication of progressive race de-generation. During shavery the negroes were under strict, but kind, discipline and moral, regular hubits were enforced. They Heed in-clean isorroundings, were well fed and nourished, and comfort-ably clothed; lived systematic lives; were free from mental worry, anxiety and responsibility. With emancipation came unbridled hubits, passions, dissipations, excesses and violations. Bad habits, vio-lation of the laws of health, indolence, and, as a consequence the negro soon began to lose vitality. His constitution became weaker and he became a more ready prey to diseases, such as insanity and consumption.

"The mental strain and responsibility

"The mental strain and responsibility and consumption.

"The mental strain and responsibility incident to caring for himself have also been significant factors. Being of an emotional and impressionable temperament, the wear and tear of excesses and the pressure of excitement have been too much for the negro. Heredity, formerly not a factor, is now a predisposing cause. Of the 280 patients received during the year, physical ill health was assigned as the cause of insanity in fifty cases; domestic trouble, 36; dissipation and victous habits, 34; religious excitement 23, and the rest to various causes. No patient had a collegiate education, 7 per cent, had a common school education, 40 per cent, could simply read and write, and 53 per cent, were illiterate, many not knowing even the alphabet."

NO MECHANICAL RESTRICTIONS.

chapel and anusement hall, and additional work shops, and a plant for making ice, and a cold storage. The superintendent devotes considerable space to the question of caring for epilleptics. He suggests two propositions for consideration: First, the establishment of a separate institution on the colony plan, for same white epileptics, and provision for the same colored epileptics in a colony annexed to this hospital, and for the insane colored epileptics separate buildings at the existing institution. Second, establish a colony for all white epileptics, same and insane, and provide at this hospital for all colored epileptics, sane and insane, and provide at this hospital for all colored epileptics, sane and insane. and insane.

DR. LE CATO.

DR. LE CATO.

Dr. Drewry, in tender terms, referred to Dr. George W. Le Cato, who for so many years was one of the valuable directors of the hospital. "In his death," he says, "the State lost an able and conscientious public servant, the medical profession a useful member, this institution a wise counsellor, and the insane, the criminal and unfortunate classes a true triend."

friend."
In closing his report, he says he would be derelict in his duty were he to fall to give public acknowledgment to the officers and employes, who have so earnestly and faithfully striven to aid in the conduct of the institution.

KITCHENER WANTS TO BECOME A DANCER

(Special Cable to The Times-Dispatch.)
LONDON Oct. 17.—No less a person than Lord Kitchone, far away in India, has come forward as a disciple of the "correspondence system" of learning things. The war hero has become a patron of a "correspondence school of dancing." This is how Lord Kitchener is learning to waltz:
The movements necessary to make an accurate dancer are indicated by means of red and blue footprints on a large chart. The would-be waltzer places the chart on the floor, sets his right foot on the red mark and his left on the blue, and carefully follows their sinuous windings.
